

INNO-SOFC Deliverable D5.5

Video clip for public dissemination

Date: 8.7.2019

Lead Beneficiary: ENEA

Nature: Report

Dissemination level: Public

Summary:

Promotion of INNOSOFC is an essential activity for the project's marketing and impact and is the responsibility of all partners. This means issuing information about the project, its context and achievements, and about the Consortium involved in its execution. This promotional activity also acknowledges the instrumental contribution of the Fuel Cells and Hydrogen Joint Undertaking and contributes to the awareness of players and the general public as regards the deployment of fuel cell systems in the European area. To this effect, a video clip of the project has been done and published in June 2018 in Youtube, on partners's webpages and on project's webpage. The video is a joint effort of INNO-SOFC, qSOFC and DEMOSOFC projects.
